The U.S. Army Reserve’s first large-scale live-fire training and weapons qualification exercise, Operation Gold Steel, was recently held at Fort McCoy, Wis.

The Fort Hood, Texas Intrepid Spirit Center recently held an open house to increase brain injury awareness in helping Soldiers cope with brain injuries.

The Department of the Army recently announced the deployment this summer of the 1st Armored Division Headquarters to Iraq for Operation Inherent Resolve.

On Point

Sexual Assault Awareness & Prevention Month

National Sexual Assault Awareness and Prevention Month is observed each year during the month of April to raise awareness and educate communities on the prevention of sexual assault. The Army’s 2017 theme is “Sexual Assault. Sexual Harassment. Not In Our Army.” This theme reinforces the mindset that all members of the Army team are empowered and have a responsibility to address sexual assault, sexual harassment, retaliation and the behaviors that lead to such indiscipline so they do not detract from mission readiness. There is no place for sexual harassment, sexual assault or retaliation in the Army.

By Col. Thomas F. Veale, III Corps Public Affairs

FORT HOOD, Texas - III Corps deployed an Expeditionary Tactical (ETAC) Command Post on 28 and 29 March via CH-47 sling load in support of Warfighter 17-04. This rapidly deployable, mobile command post builds on efforts highlighted at the Command Post Huddle at Fort Bliss, Texas on 18 January.

“It’s imperative that we increase the mobility and streamline the footprint of our command posts,” said Gen. Robert “Abe” Abrams, commander of U.S. Forces Command. The ETAC concept being employed this March and April demonstrates a forward-thinking organization’s use of existing resources to meet current and future needs.

Lessons learned during Warfighter 17-04 will continue to inform Army leaders’ dialogue regarding the way ahead for future force development, including accompanying procurement and doctrine changes to reflect new ways of doing business in a dynamic, resource-constrained, hybrid-threat environment.
